Re Item V.

- 1 Reference is made to the following document:

D1 : EP 1 126 356 A (KABUSHIKI KAISHA TOSHIBA) 22 August 2001 (2001-08-22)

2 INDEPENDENT CLAIMS 1, 10, 18 AND 25

- 2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

Document D1 discloses (the references in parentheses applying to this document): a method for operating a data processing machine, comprising: a) applying by a processor an encoding process to private-state data (par.[36], lines 2-5, the encryption/decryption unit being part of the processor, see fig.1 and par.[67]), where the private-state data captures a state of the processor (par.[36], lines 5-6);

b) writing, to a location in storage, said encoded private-state data (par.[36], lines 8-10), the location being one that is accessible to software that may be written for the processor (par.[94], lines 7-9), and

c) recovering the private-state data from the storage according to a decoding process that can undo the encoding process (par.[37], lines 1-5 and par.[98], lines 1-3).

The same reasoning applies, *mutatis mutandis*, to corresponding independent claims 10, 18 and 25

3 DEPENDENT CLAIMS 2-9, 11-17, 19-24, 26-33

Dependent claims do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty (claims 2-6, 8, 9, 11, 13-16, 19, 20, 24, 26-30, 32 and 33) and inventive step (claims 7, 12, 17, 21-23, 31) (Article 33(2) and (3) PCT) (see cited passages in the search report).
